ART UNIT

PAPER NUMBER

2812

DATE MAILED: 08/29/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/691,102	KROLL ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Savitri Mulpuri	2812	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 3/31/2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 3-9 and 14-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 3-9, 14 - 16 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### DETAILED ACTION

This action is in response to the applicant's communication amending the claims, filed on 3/31/2006.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-9, 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Catalano (US 4,845,043), in combination with Satoh (EP 1 076 358 A) and Moon et al (US 6,821,572)

Catalano discloses a method of making a PIN semiconductor device by depositing at least a layer doped with a doping agent and a layer of another type deposited on said doped layer in a single reaction chamber, wherein the deposition steps of said layers are separated by a dosing operation for avoiding the contamination by the doping agent of said another layer. Catalano teaches a boron doped silicon layer and then dosing (flushing) with a gaseous mixture capable of reaction with excess doping contaminants prior to the deposition of an intrinsic silicon layer (see abstract). Catalano further discloses performing the dosing at a temperature in the range of 200-300 °C, pressure 0.5 torr (0.666 mill bar), for a time period of 10 minutes<sup>3</sup>, wherein reactive gases are  $\text{NH}_2\text{F}$ ;  $\text{NHCl}_2$ ;  $\text{NH}_2\text{Cl}$  etc., (see col.5, lines 10-25).

Catalano does not disclose the recited compounds such as water, methanol, or isopropanol or another alcohol as claimed in claim 3 or ammonia or hydrazine or volatile organic amines as claimed in claim 4 in the flushing operation.

With respect to claim 3, Satoh et al teaches cleaning the substrate or chamber walls by using water vapor to remove doping byproducts without damaging the chamber walls or the surface of the substrate.(see abstract), It would have been obvious to one of ordinary skill in the art to provide water vapor, as alternative to nitrogen fluoride ,in the invention of Catalano to remove the contaminants such as doping byproducts and to obtain high quality surface of the semiconductor because Satoh teaches water vapor is an alternative source to remove doping by products on the surface of the substrate or on the surface chamber walls.

With respect to claim 4, Moon et al teaches using ammonia to clean the chamber after deposition of the film (see abstract, col.6, lines 26-34). It would have been obvious to one of ordinary skill in the art to use ammonia in the invention of Catalano to clean the chamber after deposition of a film on the surface of the substrate.

Claims 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over catalano in combination with Yamazaki as applied to claims 3-9, 10-15 above, and further in view of Bauer et al (US 6,124,545).

Catalano does not teach trimethylboron as dopant source. Bauer et al teaches B<sub>2</sub>H<sub>6</sub> or trimethylboron as a dopant source for p-I-n or n-I-p structures (see col.3, lines 42-

Art Unit: 2812

47). It would have been obvious to one of ordinary skill in the art to use trimethyl boron as precursor for doping because Bauer teaches the art recognized equivalents of  $B_2H_6$  or trimethylboron as dopant source.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okumura (JP-2001093889) teaches cleaning with water vapor; Yamane (JP-08055838) teaches cleaning with methanol; Yamashita (JP-11140675) teaches cleaning with alcohol..

Applicant's arguments with respect to claims 3-10, 10-16 have been considered but are moot in view of the new ground(s) of rejection.

#### ***. Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Savitri Mulpuri whose telephone number is 571-272-1677. The examiner can normally be reached on Mon-Fri from 8 a.m. to 4.30 p.m.

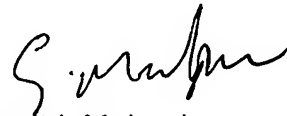

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Lebentritt, can be reached on 571-272-1873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Art Unit: 2812

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

A handwritten signature in black ink, appearing to read 'S. Mulpuri', is positioned above the printed name.
